PROFESSIONAL SUMMARY

Data Scientist with over two years of experience in leveraging SQL, Tableau and Python to analyze complex datasets, develop insightful reports, and optimize data processes. Skilled in collaborating with stakeholders to identify key metrics, automate workflows, and deliver actionable insights. Proficient in creating and maintaining data documentation and visualizations to support business decisions.

TECHNICAL SKILLS

Languages: Python, SQL R

Data Science& Framework: Linear Regression, Logistics Regression, Random Forest, Gradient Boosting,

Libraries/Frameworks: TensorFlow, Scikit-Learn, ANOVA, Chi-square test, T-Test, Bayesian statistics

Data Analysis and Visualization Tools: Tableau, PowerBI, Microsoft Excel

Cloud Technologies: Familiarity with AWS

WORK EXPERIENCE

School of Information Studies, Syracuse University

Syracuse, NY

Data Science Intern

Jul 2024 - Present

- Designed and implemented an AI agent using Python and LangChain to function as a data analyst, delivering statistical summaries tailored to business owners' needs aiming to improve operational efficiency by 4%.

Zain Telecommunication

Sudan

Data Scientist

Sep 2020 - Aug 2022

- Developed 50+ dashboards using SQL and Tableau, analyzing data from a customer base of over 12 million, to deliver actionable business intelligence.
- Collaborated with the Marketing team to optimize campaign strategies, **enhancing lead generation by 7%** through regression analysis and supervised machine learning.
- Reduced customer service agent workload by 6%**, using Python for statistical analysis to generate insights-driven recommendations.
- Presented data-driven findings to GM and senior directors on network quality metrics, **contributing to a 5% improvement in network quality** by employing statistical methods and quantitative analysis.

EDUCATION

Syracuse University, School of Information Studies, Syracuse, NY

M.S., Applied Data Science

May 2024

- Achievements: Convocation Master's Award, GPA: 4.0, Fulbright Scholarship
- Courses: Applied Machine Learning, Big Data Analytics, Statistics, Information Visualization
-

Petronas University of Technology, Engineering Department, Perak, Malaysia

B.E., Electrical and Electronics Engineering

May 2016

- Achievements: Dean's List, GPA: 3.69, PETRONAS Scholarship
- Courses: Structured Programming (C/C++), Probability and Random Process

ACADEMIC PROJECTS

Data Warehouse Design for E-Commerce Analysis

Aug – Dec 2023

- Collaborated with a team of 2 to design a data warehouse using SQL and dbt on Snowflake to manage e-commerce data.
- Developed Power BI reports for key stakeholders, visualizing Bidding performance and trends.

LEADERSHIP & AWARDS

- Led Women in Data Science(WiDS) event with **30+ participants**, fostering career development for women in data.
- Mandela Washington Fellowship for African Leaders** - Mendoza College of Business – Notre Dame University (06/2017)
- Fulbright Award** – The Bureau of Educational and Cultural Affairs of the U.S. Department of State (08/2022)
